

ENVIROPASTURES™

20 WAY™

PERENNIAL MIX

Combines high performance with palatability

20 WAY EnviroPasture is a persistent, perennial based seed mix. 20WAY Includes all 5 of the plant families required for the synergistic interaction that occurs between High diversity crops and soil. 20WAY is a resilient mix that can thrive in tough conditions, producing feed through dry spells and the depths of winter. 20 way has a strong focus on bulk Dry Matter (DM) and high levels of Metabolisable energy (ME) with comparable tests showing high digestibility and good levels of protein our mix ensures good feed for stock in even the toughest of conditions. 20WAY scores very low on the grass stagger index. Planting in Autumn or Spring.

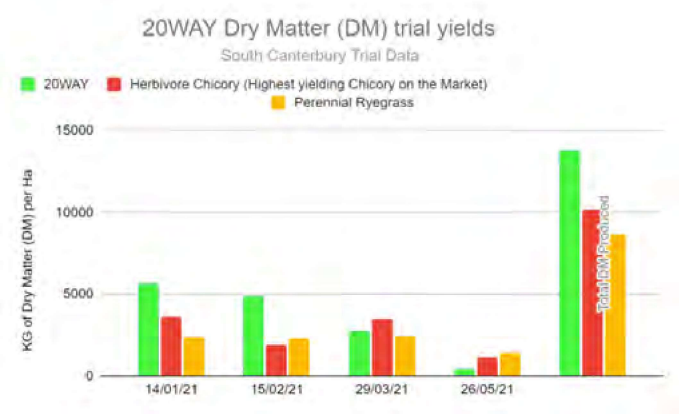

0800 NZSEED - admin@pastoralimprovements.co.nz
www.pastoralimprovements.co.nz

Reduces soil compaction by up to 40%
Sowing Rate: **50kg per Ha**
Perenniality - Perennial

Type:

Rainfall: **500-800**
Rainfall (mm)

- BENEFITS:**
- Contains 20 varieties prompting synergistic interactions
 - Bulk dry matter (DM) production
 - High level of Metabolisable energy
 - High protein levels
 - Can be sown in Autumn or Spring
 - Provides good feed in tough conditions

Autumn Test	20 WAY	Perennial Ryegrass Mix
Ash %	10.3	13
Protein %	15.8	16.2
NDF %	36.7	38.2
Lignin %	6.2	1.9
In vivo DOMD%	67	67.9
ME MJ/Kg (DM)	10.7	10.2
