

ENVIROPASTURES™

Avocado

Orchard Floor Y2

At pastoral improvements we provide seed mixes specifically designed for New Zealand's unique settings and situations. Our team of Farmers and Growers have developed and refined seed mixes for Horticultural settings that will provide Organic Matter, alleviate compaction and increase sub-soil activity. We know the use of cover crops and regenerative practices greatly improves soil structure, tree health and microbial activity.

Established Avocado Orchard Special Seed Mix Data

An inter-row mix for orchards. This mix contains many different beneficial cultivars to feed the soil, build organic matter, provide nutrients, reducing compaction and improving the soil structure. It is designed to improve moisture retention and reduce erosion by keeping the soil covered.

Pastoral
IMPROVEMENTS LTD

Performance: Perennial 2-3 years
Reduces soil compaction by up to 25%
Sowing Rate: **44 kg per Ha**

Rainfall:

350+
Rainfall (mm)

Avocado Orchard Special Mix

Our Special Avocado mix is ideal for established and mature orchards. Our special mix reinvigorates soil and biological activity, builds soil carbon, provides natural nitrogen, and scavenges Phosphate. Its attractive to beneficial insects, this mix promotes fungal activity while improving water infiltration. After seed set can be used for mulch and compost.

BENEFITS:

- Shade tolerant
- Prepares soil, prior to planting
- Bulk Organic Matter for mowing/mulching/compost
- Combates compaction
- Fungi and silica promoting
- Attractive to beneficial insects
- Encourages synergistic relationships between plant & soil
